The Complete Payment Solution

CashFlow® mei-pay is a complete range of Cashless solutions that adapts to the needs of every application. Individual customers have a variety of requirements, some are looking for a simple additional payment option to cash, others demand integration with existing access and identification cards or a range of discounts and bonus rewards for employees.

CashFlow® mei-pay is based on MIFARE® technology, which, as an open standard, provides the flexibility you need to respond to your customers' varied needs. MIFARE® also offers the benefits of a contactless solution: with no moving parts or key insertion required, reliability is assured.

System benefits:

- Profitability – wider choice of payment options to increase consumer spending
- Flexibility of pricing – price increments from 1c
- Low cost of ownership – having no moving parts reduces maintenance costs
- Ease of use – from installation and programming to diagnostics via tri-coloured LEDs and taking audit
- Reliability - robust design with minimal wear and tear
- Quality – proven MICROTRONIC technology inside

Ease of Programming:

- With high speed Windows XP set up via intuitive menu, mei-pay can be as simple or sophisticated as you want it to be
- Programmable using set-up key
- Media can be auto configured to work on a site on first insertion
- Lost or stolen cards can be blocked from the system
- Security option to allocate individual codes to each site
- Secure site identification codes are hidden from unauthorised programmers. Your information and that of your customers is secure
- Windows compatible mei-pay STS support tool

Variety of Bonus Options:

- Real time clock ensures a wide variety of bonus types including discounts and bonus periods
- Individual cards can be programmed with up to 9 bonus periods per day
- Free vend options that can be reset or carried over at the end of the day
- Loyalty bonuses triggered by usage
- User groups within a site can be set up to give different bonuses to different groups of employees
- Subsidies can be set by selection or by user

Compliance:

- Audit fully compatible with EVA/DTS standard
- Compatible with EVA/DTS and EVA/CVS
- MIFARE® registered architecture
- Windows based service tools compatible with Windows 98, 2000 and XP
- Compatibility with existing management systems
